in LinkedIn

Adaptable student with knowledge of application development, configuration management, and database design. I'm proficient in HTML, CSS and Javascript, with a strong focus on user experience and cross-browser compatibility. Experienced in utilizing modern frontend frameworks and tools to deliver intuitive and efficient interfaces. I have experience completing personal projects that demonstrate my ability to work independently and deliver quality results. I am actively seeking new opportunities to expand my skills and grow as a professional in the technology industry.
